

## **March 22, 2013 "Individual Dock Repair Notification"**

Dear Mr. Marco,

Waterside will begin the renovation of its docks during the week of March 25, 2013. Your dock has been selected for replacement this year.

Once the project begins, each dock is expected to take five (5) working days to complete. You will receive notice from the POA approximately five (5) days before construction begins. Please remove any personal items you may have from the dock prior to construction.

If your dock contains additional material over and beyond the single pier most of the Waterside docks follow, such as decking, or side wings, please advise prior to construction if you would like those replicated. If you choose to do this, the cost associated with the additions will be your responsibility.

It is highly recommended you relocate your boat during the construction process. The POA will gladly assist you in finding a suitable spot to dock your boat during the construction process.

The following link provides the planned repair schedule. [Schedule of repairs](http://admiralscovepoa.com/MPOA/032213%20DocksIndi.htm).

If you have any questions regarding the process please do not hesitate to contact me.
